ANGULOIA AND BULBOPHYLUM

White concrete

Anguloia: 2100 x 3200mm

Bulbophylum: 900 x 1200mm

Following on from their recent awe inspiring installation of an out-scaled water feature for Southern Guild ReCollect at The Woodstock Foundry, Astrid Dahl and Bruce Knight create two more super-sized 'ceramic works'.

"I have always loved to push the limits with my ceramic forms and with Bruce's detailed and skilled method of scaling and enlarging, I have found an extraordinary freedom in replicating them." The fact that the pieces are cast in white concrete, which is suited to outdoor conditions, adds a new dimension to this internationally collected ceramicist's work and the new material allows for the play of water over the surfaces which creates a sense of movement and 'aliveness', enhancing the lines of the sculpture.
